1. This application contains claims 1-41, 44 and 52 directed to various patentably distinct species of the claimed invention.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Scalzo whose telephone number is (703) 308-4696.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235.

1. Applicants have responded to the election of species requirement by selecting the compound of the formula:

This compound is the same as the one elected in the parent case.

A number of other compounds have also been examined in addition to the above species; the examined matter is as follows and forms Group I, below.

Restriction under 35 USC 121 is required to one of the following inventions:

Group I: Compounds, compositions, and methods where the compound's "Q" moiety is of Formula VII, and "X" is $-(CH_2)_3-$, and none of the substituents can contain a nitrogen-containing six or seven membered ring (e.g. pyridyl, quinoline, piperidine), and R_6 and R_7 may not join.

Claims 1, 7, 11-25, 27, 28, 31-41, 52-54 contain these types of compounds.

Group II(+): Other subject matter.

These Groups of inventions are separate and distinct due to their individual and widely divergent structures. A reference teaching only the compounds of Group I would not be anticipatory of the Group II compounds, nor would the Group II compounds be obvious from it, in the absence of a reference teaching otherwise.

Applicant is required to make a statement of which Group is elected, as a matter of form. The elected species is a part of Group I, so normally Group I would be the elected Group also.

EXAMINER'S ACTION

Serial Number: 08/167881
Art Unit: 1208

-2-

1. In the response from Applicant dated May 22, 1995, the species found at the bottom of page 6 of the election paper was elected with traverse, however it is noted that this structural portrayal of the compound elected is incorrect; it apparently should have a NH linker in place of the bent line denoting a CH₂ linker attached on the piperidine ring. (A telephone conversation was initiated by the Examiner on August 4, 1995 with applicants' council, Ms. DeBenedictis to mention it).

Also, applicants have stated that this case is filed under 35 USC 371, so the PCT unity requirements are to be followed rather than the 35 USC 121 restriction practice. That observation is correct; therefore, the restriction requirement is hereby converted into a PCT lack of unity statement, as follows.

Lack of unity has been found in this application under the PCT guidelines. Several groups of inventions have been found to exist in this application which are too numerous to list. However, applicants have indicated their preferred species to be:

where Q is 2-phenyl-3-yl-piperidinyl,
one of the X groups is OCH₃, another is OCF₃, and
the last one is H.

Therefore, Group I is as follows:

(I) Compounds, compositions and uses where
Q is piperidinyl, and there are no other
heterocycles in the compound.

(II+) Other compounds.

In situations similar to this one, where there are so many different ring core structures, an applicant is often concerned that the costs incurred from the filing of numerous divisional applications would be prohibitive, and thus many inventions would be lost. The US PTO is also concerned with this, since it is our intention that inventions be released into the public domain, and thereby further the state of the art. Accordingly, examination will begin with the Group I invention listed above, but if it is seen that the scope of the examination can be extended, it will be. It is possible that some substituents which are heterocyclic might be included in the future or even some of the Q ring systems other than the piperidinyl, if allowable subject matter is found. For now, however, it is best if the claims remain essentially as they are (except perhaps with a change to the R²

Serial Number: 08/167881
Art Unit: 1208

-3-

and R² definitions as discussed below). (And perhaps an inclusion of "fluoroalkoxybenzylamino" just before "compound" in the preamble, since the presence of the fluoroalkoxy group is required and is a significant element to the invention herein).

2. Claims 7, 9-25, 27, 28, 31-41 and 52-56 are rejected under 35 U.S.C. § 112, second paragraph, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The definitions for R⁸ and R⁹ do not include the possibility of a spiro group being formed, but the spiro is mentioned in the proviso language (page 5 of the most recent amendment, line 12).

3. Any inquiry concerning this communication or earlier communications should be directed to **Examiner Scalzo** [(703) 308-4696, 7:30-6:00 Tuesday-Friday (or SPE Geist at (703) 308-1701)]. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235.
